Innovation born out of love

When Ken Jacuzzi, age 2, was diagnosed with rheumatoid arthritis, his father invented the world's first at-home pump to provide pain-relieving hydromassage. Since then, Jacuzzi has expanded across a range of wellness products that nurture the body and restore the mind.

A woman with blonde hair and pink lipstick is lying back in a black massage chair, eyes closed, appearing to be in a state of relaxation. The chair has a sleek, modern design with visible massage rollers. The background is softly blurred, showing what appears to be a home interior.
